Allowable Subject Matter

1. Claims 7-12 are allowed. The claims will be renumbered as 1-6.
2. The following is an examiner's statement of reasons for allowance: the instant invention discloses an apparatus and method for identifying a person by using biometric features. The instant invention distinguishes from the prior art of record by the manner in which the identification is carried out. Upon detecting the biometric features of the part of the person's authentication area, the instant invention compares the detected biometric features with biometric features, stored in a memory, of a part of the authentication area of an authorized person for determining the relative position of the detected biometric features within the part of the authentication area, and then the instant invention calculates an identification code, which identifies the person from the detected biometric features which are not stored in the memory on the basis of the relative position of the biometric features which are stored in the memory within the stored authentication area. These features in combination with all of the other elements of the claims are not taught or fairly suggested by any one of the prior arts of record, and thus claims 7-12 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
